Style 07-029A Packing

Pure PTFE/PTFE Dispersion

Description

Lewco Style 07-029A Packing is braided of Pure PTFE filament yarns and impregnated with PTFE dispersion. It is a firm high density braided packing. Lewco Style 76-029A can be used in a wide range of process chemicals and concentrated acids, valve stems, rotary shafts, reciprocating equipment and other processing equipment with high peripheral speed, rods and pistons.

Extremely wide range of service uses such as: water, steam, concentrated acids and caustics, solvents, oils, fatty acids, detergents and aggressive gases. It is also resistant to gamma and neutron rays, hydrogen, heat transfer oils, and most other chemicals and solvents. **It is not suitable for alkali metals and fluorine compounds at high temperatures and pressures.**

Application Data:

	Rotary	Reciprocating	Valve
Pressure: PSI	159	3600	2600
Speed: FPS	39	6.5	4.9
pH Range	0-14		
Temp. °F	-400 to +500
